GLOBAL PERSPECTIVE

2 million +
Social
Network

SOCIAL MEDIA NETWORK

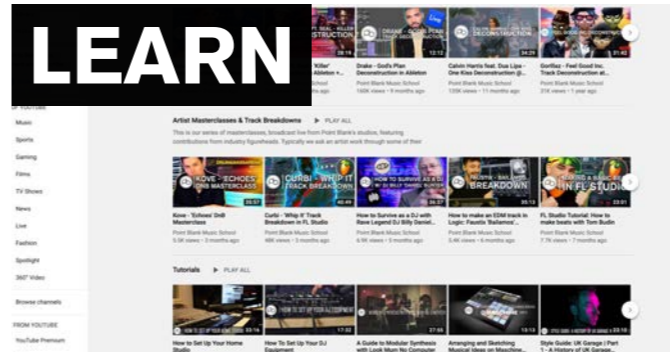

Point Blank is unique amongst other music schools for having an extensive global reach via its own social media channels. Our YouTube, Facebook, Twitter and Instagram followers exceed two million and counting, encompassing a connected, loyal audience of music makers and electronic production enthusiasts alike. This represents a fantastic opportunity for our students to promote their music, creative projects and events to a massive audience worldwide, thereby gaining invaluable publicity via the school during study and long after graduation.

When our students succeed, we succeed.

That's why there are a number of exciting projects our student body have launched with us to help them build their careers and broaden their social footprint.

LEARN

We encourage our students to take part in Point Blank Showcases – these termly events give our students a feel for live performance in real venues and the chance to experience gigging in packed-out venues such as fabric, the Camden Club and many other local venues across Shoreditch and Dalston. Additionally, we host regular parties and events which are streamed live globally, allowing our students to take centre stage.

PROMOTE

CELEBRATE

We love to shout about our students' success. In fact, we regularly do so using our online blog. The Student Success feature happens monthly and spotlights three talented Point Blank students past or present in an interview style write-up.

Our social space is fantastic for any aspiring or advanced musician to learn new creative techniques, find out about the latest industry updates, hear new and underground music and see first-hand reviews of software, hardware and new boundary-pushing tech. In conjunction with this, we regularly upload new music tutorials to our channels, adding to our extensive catalogue of existing content - so be sure to keep watching.

It's important for Point Blank students to be proactive and passionate when it comes to their personal projects. That's why we use our large social presence to help promote their events, releases and highlight their achievements.

If an applicant has no prior experience in business or music-related subjects then we may be able to consider an application if the personal statement indicates enthusiasm and an appetite for success within the music industry.

* Applicants to the Music Systems Engineering Degree would preferably need a science, technology, engineering or maths (STEM) related A-Level or equivalent and a GCSE grade 4 or above in maths. If an applicant has no prior experience in STEM or music-related subjects, then we may be able to consider an application once further assessments are made through all or any of the following: admissions test, interview with an academic, or a maths assessment.

* If you are interested in enrolling on one of our degree programmes but do not meet the entry requirements, the Foundation Year course could be for you. This course aims to build your confidence and provide you with the necessary transferable skills you will need to progress onto one of our undergraduate degrees.

- > **Entry requirements for the Foundation Year are: DD AT A LEVEL OR EQUIVALENT.**
